2. Of the imports 100,000 tons will not be received. Iron ore will therefore be reduced in favor of steel ore (sic).

3. As a result of the threatened shortage of ores in 1953, the State Economic Planning Commission has reduced the pig iron production plan for 1953 by 100,000 tons; that is, the nonfulfillment of the plan will be tolerated to this extent. This a secret decision, which is not to be published.
